

Our mission at SIMS Academy is to collaborate with students to create a path that leads to success through real-life learning opportunities.

Dual Enrollment Opportunities

SIMS Academy partners with Lanier Technical College to offer dual enrollment students the opportunity to earn high school and college credits in a supportive environment. A half-day or full-day program can be offered to students, so that they will be able to continue to participate in extracurricular activities.

Career Pathways

Together with local industry, business and community leaders, we identified the most necessary career paths in our region. Our instructors have been selected for their industry expertise, and all labs are equipped with the latest equipment.

Newcomer Academy

Newcomer Academy serves high school students who are new to the United States with limited English proficiency. In these classes, students develop their English proficiency, receive academic support and credits toward graduation, and develop a plan for graduation and beyond.

STEP & YES Programs

Student Transition Enrichment Program (STEP) has worked alongside students with disabilities as they transition to life after high school so that they can reach their true potential. Youth Employment Services (YES) program is a class for students with disabilities that are in their senior year of high school with the goal of helping seniors be better prepared for independent employment after high school.

SIMS...Your Path to Success
